Subject Index

Acetic anhydride

Acetic anhydride synthesis from methyl formate catalysed by rhodium-iodide complexes 219

Acid sites

Coke formation in high-silica zeolites — a review 1

Acidity

Oxidative coupling of methane on lithium-calcium phosphate catalysts 141

Acidity

Factors affecting selectivity in the rearrangement of cyclohexanone oxime to caprolactam over modified aluminas 75

Acidity

Influence of boria loading on the activity of B_2O_3/Al_2O_3 catalysts for the conversion of cyclohexanone oxime to caprolactam 91

Aging

Catalytic behavior of platinum ion-exchanged zinc-aluminosilicates in n-pentane aromatization 35

Alkane adsorption

Calorimetric and catalytic investigation of alkanes reactivity over a variety of MFI structures 181

Alumina

Factors affecting selectivity in the rearrangement of cyclohexanone oxime to caprolactam over modified aluminas 75

Alumina

Catalyst for the elimination of sulphur dioxide from streams by the Claus reaction at low temperature 231

Aromatization

Catalytic behavior of platinum ion-exchanged zinc-aluminosilicates in n-pentane aromatization 35

Basicity

Oxidative coupling of methane on lithium-calcium phosphate catalysts 141

Beckmann rearrangement

Factors affecting selectivity in the rearrangement of cyclohexanone oxime to caprolactam over modified aluminas 75

Beckmann rearrangement

Influence of boria loading on the activity of B_2O_3/Al_2O_3 catalysts for the conversion of cyclohexanone oxime to caprolactam 91

Bimetallic particles

Correlation between chemisorption and the mechanism of carbon monoxide hydrogenation over Pt-Co/NaY catalysts 61

Boria loading

Influence of boria loading on the activity of B_2O_3/Al_2O_3 catalysts for the conversion of cyclohexanone oxime to caprolactam 91

Boron oxide

Influence of boria loading on the activity of B_2O_3/Al_2O_3 catalysts for the conversion of cyclohexanone oxime to caprolactam 91

Butanone selective oxidation

Kinetic study of the selective oxidation of butan-2-one to diacetyl over vanadium phosphorus oxide 203

Caprolactam

Factors affecting selectivity in the rearrangement of cyclohexanone oxime to caprolactam over modified aluminas 75

Caprolactam

Influence of boria loading on the activity of B_2O_3/Al_2O_3 catalysts for the conversion of cyclohexanone oxime to caprolactam 91

Carbon monoxide hydrogenation

Correlation between chemisorption and the mechanism of carbon monoxide hydrogenation over Pt-Co/NaY catalysts 61

Catalyst characterization (adsorption, IR, TPD)

Factors affecting selectivity in the rearrangement of cyclohexanone oxime to caprolactam over modified aluminas 75

Catalyst characterization (BET, TPD, XRD)

Influence of boria loading on the activity of B_2O_3/Al_2O_3 catalysts for the conversion of cyclohexanone oxime to caprolactam 91

Chemisorption

Correlation between chemisorption and the mechanism of carbon monoxide hydrogenation over Pt-Co/NaY catalysts 61

Claus reaction

Catalyst for the elimination of sulphur dioxide from streams by the Claus reaction at low temperature 231

Coke

Coke formation in high-silica zeolites — a review 1

Commercialized catalytic processes

Recent progress in catalytic technology in Japan (supplement) — a review 103

Copper-based catalysts

Kinetic study of steam reforming of methanol over copper-based catalysts 245

Cracking

Calorimetric and catalytic investigation of alkanes reactivity over a variety of MFI structures 181

Cyclohexanone

Influence of boria loading on the activity of B_2O_3/Al_2O_3 catalysts for the conversion of cyclohexanone oxime to caprolactam 91

Cyclohexanone oxime

Factors affecting selectivity in the rearrangement of cyclohexanone oxime to caprolactam over modified aluminas 75

Deactivation

Coke formation in high-silica zeolites — a review 1

Emission control catalysts

Recent progress in catalytic technology in Japan (supplement) — a review 103

Ethylbenzene alkylation

Shape selective reactions of some inorganic compounds on the zeolite KZ-1 191

Ethylbenzene decomposition

Shape selective reactions of some inorganic compounds on the zeolite KZ-1 191

High-silica zeolites

Coke formation in high-silica zeolites — a review 1

Hydrodesulphurization

Titania-alumina mixed oxides as supports for molybdenum hydrotreating catalysts 163

Hydrogen production

Kinetic study of steam reforming of methanol over copper-based catalysts 245

Hydrogen sulphide

Catalyst for the elimination of sulphur dioxide from streams by the Claus reaction at low temperature 231

Hydrotreatment

Titania-alumina mixed oxides as supports for molybdenum hydrotreating catalysts 163

Hydroxylation

Catalytic hydroxylation of phenol over vanadium silicate molecular sieve with MEL structure 123

Isomerization

Isomerization of xylene isomers on a PtRe-H-mordenite catalyst 131

Japan

Recent progress in catalytic technology in Japan (supplement) — a review 103

Kinetics

Kinetic study of the selective oxidation of butan-2-one to diacetyl over vanadium phosphorus oxide 203

Kinetics

Kinetic study of steam reforming of methanol over copper-based catalysts 245

KZ-1

Shape selective reactions of some inorganic compounds on the zeolite KZ-1 191

Lithium doping

Oxidative coupling of methane on lithium-calcium phosphate catalysts 141

MEL structure

Catalytic hydroxylation of phenol over vanadium silicate molecular sieve with MEL structure 123

Methane

Oxidative coupling of methane on lithium-calcium phosphate catalysts 141

Methane coupling

Characterization of catalysts for methane coupling by means of thermal methods 47

Methanol selectivity

Correlation between chemisorption and the mechanism of carbon monoxide hydrogenation over Pt-Co/NaY catalysts 61

Methanol steam reforming

Kinetic study of steam reforming of methanol over copper-based catalysts 245

Methyl acetate

Acetic anhydride synthesis from methyl formate catalysed by rhodium-iodide complexes 219

Methyl formate

Acetic anhydride synthesis from methyl formate catalysed by rhodium-iodide complexes 219

Microcalorimetry

Calorimetric and catalytic investigation of alkanes reactivity over a variety of MFI structures 181

Mixed oxides

Titania-alumina mixed oxides as supports for molybdenum hydrotreating catalysts 163

Molecular sieves

Catalytic hydroxylation of phenol over vanadium silicate molecular sieve with MEL structure 123

H-Mordenite

Isomerization of xylene isomers on a PtRe-H-mordenite catalyst 131

MoS₂

Titania-alumina mixed oxides as supports for molybdenum hydrotreating catalysts 163

New catalysts

Recent progress in catalytic technology in Japan (supplement) — a review 103

MAS-Nuclear magnetic resonance

Shape selective reactions of some inorganic compounds on the zeolite KZ-1 191

Oxidation

Oxidative coupling of methane on lithium-calcium phosphate catalysts 141

Oxidative coupling

Oxidative coupling of methane on lithium-calcium phosphate catalysts 141

Phenol hydroxylation

Catalytic hydroxylation of phenol over vanadium silicate molecular sieve with MEL structure 123

Phosphates

Oxidative coupling of methane on lithium-calcium phosphate catalysts 141

Platinum

Catalytic behavior of platinum ion-exchanged zinc-aluminosilicates in n-pentane aromatization 35

Platinum-rhenium

Isomerization of xylene isomers on a PtRe-H-mordenite catalyst 131

Platinum-cobalt

Correlation between chemisorption and the mechanism of carbon monoxide hydrogenation over Pt-Co/NaY catalysts 61

Pore size

Catalyst for the elimination of sulphur dioxide from streams by the Claus reaction at low temperature 231

Pt/NaY

Correlation between chemisorption and the mechanism of carbon monoxide hydrogenation over Pt-Co/NaY catalysts 61

Pt-Co/NaY

Correlation between chemisorption and the mechanism of carbon monoxide hydrogenation over Pt-Co/NaY catalysts 61

Reforming

Kinetic study of steam reforming of methanol over copper-based catalysts 245

Regeneration

Coke formation in high-silica zeolites — a review 1

Rhodium

Acetic anhydride synthesis from methyl formate catalysed by rhodium-iodide complexes 219

Selectivity (C₂ + hydrocarbons)

Oxidative coupling of methane on lithium-calcium phosphate catalysts 141

Selectivity (caprolactam)

Factors affecting selectivity in the rearrangement of cyclohexanone oxime to caprolactam over modified aluminas 75

Selectivity (caprolactam)

Influence of boron loading on the activity of B₂O₃/Al₂O₃ catalysts for the conversion of cyclohexanone oxime to caprolactam 91

Selectivity (diacetyl)

Kinetic study of the selective oxidation of butan-2-one to diacetyl over vanadium phosphorus oxide 203

Sepiolite

Catalyst for the elimination of sulphur dioxide from streams by the Claus reaction at low temperature 231

Shape selectivity

Shape selective reactions of some inorganic compounds on the zeolite KZ-1 191

Silica

Catalyst for the elimination of sulphur dioxide from streams by the Claus reaction at low temperature 231

Steam reforming

Kinetic study of steam reforming of methanol over copper-based catalysts 245

Substituted MFI

Calorimetric and catalytic investigation of alkanes reactivity over a variety of MFI structures 181

Sulphur dioxide

Catalyst for the elimination of sulphur dioxide from streams by the Claus reaction at low temperature 231

Supports

Titania-alumina mixed oxides as supports for molybdenum hydrotreating catalysts 163

Temperature-programmed reduction

Characterization of catalysts for methane coupling by means of thermal methods 47

TiO₂/Al₂O₃

Titania-alumina mixed oxides as supports for molybdenum hydrotreating catalysts 163

Titania/alumina

Titania-alumina mixed oxides as supports for molybdenum hydrotreating catalysts 163

Toluene alkylation

Shape selective reactions of some inorganic compounds on the zeolite KZ-1 191

Vanadium silicate

Catalytic hydroxylation of phenol over vanadium silicate molecular sieve with MEL structure 123

Vanadium-phosphorus oxide

Kinetic study of the selective oxidation of butan-2-one to diacetyl over vanadium phosphorus oxide 203

X-ray photoelectron spectrometry

Catalytic behavior of platinum ion-exchanged zinc-aluminosilicates in n-pentane aromatization 35

Xylene isomers

Isomerization of xylene isomers on a PtRe-H-mordenite catalyst 131

Yttrium oxide

Characterization of catalysts for methane coupling by means of thermal methods 47

Zeolites

Isomerization of xylene isomers on a PtRe-H-mordenite catalyst 131

Zeolites

Coke formation in high-silica zeolites — a review 1

Zeolites

Shape selective reactions of some inorganic compounds on the zeolite KZ-1 191

Zeolites

Catalyst for the elimination of sulphur dioxide from streams by the Claus reaction at low temperature 231

Zeolites

Calorimetric and catalytic investigation of alkanes reactivity over a variety of MFI structures 181

Zinc oxide

Characterization of catalysts for methane coupling by means of thermal methods 47

Zinc-aluminosilicate

Catalytic behavior of platinum ion-exchanged zinc-aluminosilicates in n-pentane aromatization 35

ZSM-5

Coke formation in high-silica zeolites — a review 1
